

## **Two Ground-Breaking Compliance Innovations Launched by JIL Process**

February 4, 2016 – JIL Process, a technology compliance leader in the process serving industry, is pleased to announce that two ground-breaking compliance initiatives have been launched. The two compliance innovations are TrueServe process server certification and the “Secret Servee” program. TrueServe annual certification of process servers in the field is an 8-hour education multi-section course with testing for each section. The components of the course are general process serving, state-specific process serving and collection industry-specific process serving. The “Secret Servee” program takes the secret shopper concept to process serving in order to identify any lapses in the consumer experience. This innovative program is conducted with all servers each year. Scott Levine, President of JIL Process, said “you can never do enough to ensure process servers are adequately trained and versed in the service of process.” JIL Process has consistently introduced new process serving compliance innovations over the last ten years.

### **About JIL Process Corporation**

With 25 years experience, JIL Process is a Process Serving Agency specializing in serving collection papers. Through advanced proprietary technology and forward thinking, JIL has established itself as the technology and compliance leader in process serving. With technology, JIL believes in free value adds rather than “nickel and diming”. Compliance runs in JIL’s blood, offering a level of compliance that is not available from traditional process serving agencies. JIL Process is SSAE-16 and SOC-1 certified and in full compliance with the Process Serving Standards Summit standards. With service, JIL believes in corporate owned and operated state offices, rather than third party affiliates. JIL has more corporate owned offices than any other process server and continues to expand nationwide!
